

## Sheet 9

Create an HTML document called “index.html”.

The document contains the HTML code to design a web page similar to the following one:

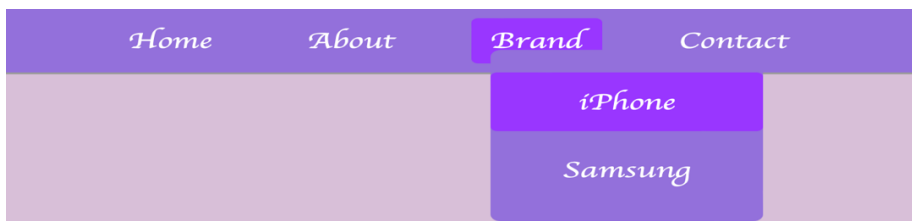

**The design of your web page must follow the following instructions:**

1. The entire web page has a color code “#D8BFD8” as a background color.
2. The web page is divided into the following three parts: Header, Navigation Bar, and Middle.
  - a. Header contains the following: two images and some formatted text.

- b. Navigation Bar contains an unordered list of hyperlink elements that looks like the following using the provided style sheet.

- c. Middle contains an iframe element.
  - The source of the iframe element and the “Home” link in the navigation bar refer to the same image named “cellphones.jpg”.
  - The “iPhone” link refers to a web page called “iphone.html”, and the referred page should be displayed in the iframe element.

- The “iphone.html” page should look like the following.

## Apple iPhone 13

- The “iphone.html” page contains a “Check out” link that refers to another web page called “checkout.html”. The referred page should be displayed in the `iframe` element and look like the following.

### Shipping Details

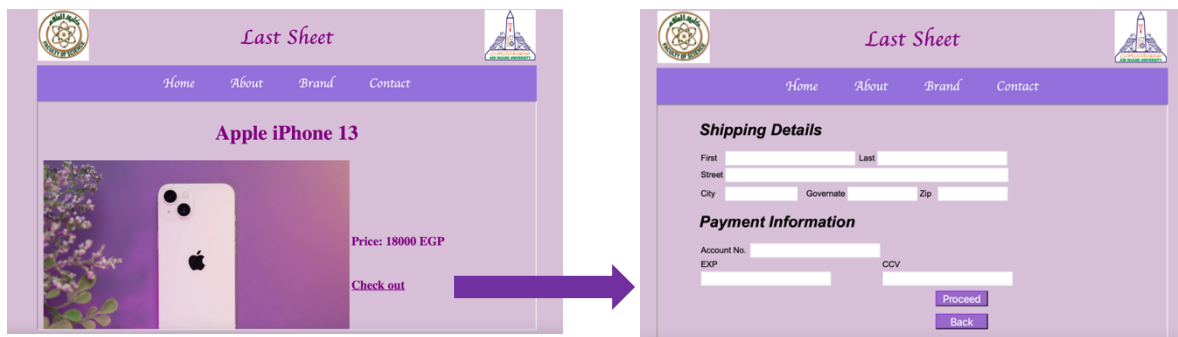

First  Last   
Street   
City  Governate  Zip

### Payment Information

Account No.   
EXP  CCV   

Proceed  
Back

- The whole web page should look like the following, when clicking the “iPhone” and “Check out” links.

### Hint:

- The word “Last sheet” in the header part has the following format: “h1” heading, “20px” font size, “cursive” font type, and “purple” text color.
- The word “Apple iPhone 13” in the “iphone.html” page has the following format: “h1” heading, “40px” font size, and “purple” text color.
- The word “Price: 18000 EGP” in the “iphone.html” page is formatted as follows: “h2” heading, “20px” font size, and “purple” text color.
